DETAILED ACTION

Election/Restrictions

1. Applicant's election *without traverse* of Group I, claims 1-15, in Paper No. 6 are acknowledged. Claims 16-22 are withdrawn from consideration as being directed to non-elected invention.

Priority

2. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d).

Information Disclosure Statement

3. The information disclosure statement (IDS) filed on 11/29/01 has been considered by the examiner.

Oath/Declaration

4. The declaration filed 11/29/01 is acceptable.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 9, 12 and 14 are rejected under 35 U.S.C. 102(e) as being anticipated by Herrmann (6,449,079).

The figures and reference numbers referred to in this office action are used merely to indicate an example of a specific teaching and are not to be taken as limiting.

Regarding claims 9, 12, and 14, Herrmann (see specifically figures 1-2 attached, Col. 5, lines 40+, and Col. 6) discloses a method of making a micromirror unit from a material substrate having a multi-layer structure including a plurality of silicon layers (21-23) and an intermediate layer (22) of silicon oxide, the micromirror unit including a mirror forming base (11), a frame (13), and torsion bars (12/12'), the method comprising the steps of: forming a pre-torsion bar (and the mirror base) by etching the silicon layer (23), the pre-torsion bar being smaller in thickness than the mirror forming base (see figure 2) and held in contact with the intermediate layer (see figure 1); and forming the torsion bar by removing the intermediate layer contacting with the pre-torsion bar (Col. 6, lines 5+).

Allowable Subject Matter

7. Claims 2-15 are allowed.
8. The following is a statement of reasons for the indication of allowable subject matter:

The prior art taken either singly or in combination fails to anticipate or fairly suggest at least one process step of: a) *attaching a third silicon layer to the first*

silicon layer for forming a second material substrate incorporating the pre-torsion bar, as recited in independent claim 2; b) etching the silicon layer by using a mask pattern arranged to avoid a region in which the torsion bar is formed, the etching being continued until the intermediate layer is exposed, as recited in independent claims 4-10 and 13; especially when these limitations are considered within the specific combination claimed.
